

Brief Of Final Project

Prepared by: Hamzeh Obeidat

Project Name:Booking Room In Big By Orange

Objective for project:

Managing and reserving rooms in buildings Tedious and complicated task. A combination of different rooms with different sizes, and the possibility of choosing between different Dates and times are the reason why a good reservation system is needed to make this task as easy as possible.

This site makes it easy for the end-user to view all rooms based on date and time. It also allows users to log into the site and choose the appropriate room at the time they want.

Description :

This website has been created to organize the reservation process at the Big By orange building and allows the end-user to choose meeting and training rooms at any time and any day.

Dashboard:

CRUD operation for:

an end-user, a training and meeting room, Admin.

The site displays the calendar and people who have booked inside the rooms with the time display.

The user can search for suitable rooms at the time he wants.

Technologies:

- Html5**
- Css**
- Bootstrap (orange bootstrap)**
- Laravel (version 7)**
- Mysql**

Conclusion:

The benefit of having a booking system for the Big By Orange is to save time and facilitate the process of reserving rooms inside the building.
